Simulation of Groundwater Heads and Flows for Water Resources

Guest Editor:

Dr. Zahra Thomas

Institut Agro| INRAE SAS, 65 rue
de St-Brieuc, CS 84215, CEDEX,
35042 Rennes, France

Deadline for manuscript
submissions:

closed (28 December 2022)

Message from the Guest Editor

Modeling groundwater flows is a major challenge in understanding transport and reactivity. Water recharge and vulnerability can be assessed using mechanistic models and environmental tracers. Scientific outcomes from groundwater modelers can help support groundwater managers and decision makers in evaluating groundwater vulnerability and in implementing measures aiming to protect water resources.[...]

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
