## Application of Environmental Isotope Technology in Hydrogeology

Guest Editors:

**Prof. Dr. Xiaosi Su**

Institute of Water Resources and Environment, Jilin University, Changchun, China

**Prof. Dr. Yanlong Kong**

Institute of Geology and Geophysics, Chinese Academy of Sciences, Beijing, China

Deadline for manuscript submissions:

**closed (20 April 2022)**

### Message from the Guest Editors

Groundwater, the world's largest distributed store of fresh water, plays a key role in safe supply of clean water, sustaining ecosystems and enabling human adaptation to climate change. The environmental isotope (including naturally occurring nuclides as well as artificial tracers) technique have become a fundamental tool in groundwater science and engineering. In recent years, significant advances of groundwater science have been achieved with the widely application of environmental isotope technology. To make the gained knowledge aid individuals to understand groundwater and its related horological processes, we propose this issue to collect papers related to these topics [...]

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
