Marine Atmospheric Chemistry

Guest Editors:

Prof. Dr. Liqi Chen

Prof. Dr. Guipeng Yang

Prof. Dr. Laodong Guo

Prof. Dr. Di Qi

Deadline for manuscript
submissions:

closed (28 February 2023)

Message from the Guest Editors

Marine atmospheric chemistry is a multidisciplinary and comprehensive experimental science and is closely integrated with marine chemistry and atmospheric chemistry to study the concentrations, transformation, transport, and sources as air-sea exchange processes and fluxes of chemical species. This Special Issue on marine atmospheric chemistry in the journal of *Water* will focus on investigating biogeochemical processes and air-sea fluxes of climate-sensitive chemical species such as C, N, P, S, Fe, etc., predicting their increasing trends, and estimating their impacts on global change and regional marine ecosystems, especially in coastal and offshore oceans and the Arctic and Southern Oceans.

For further reading, please follow the link to the Special Issue Website at:

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
