## Modelling Approach to Wastewater Membrane Filtration Processes

Guest Editors:

**Dr. Jaime Lora Garcia**

Universitat Politècnica de València, Valencia, Spain

**Prof. Dr. Silvia Álvarez-Blanco**

Department of Chemical and Nuclear Engineering, Universitat Politècnica de València, 46022 Valencia, Spain

**Dr. María Cinta Vincent-Vela**

School of Industrial Engineering, Universitat Politècnica de València, 46022 Valencia, Spain

Deadline for manuscript submissions:

**closed (30 April 2021)**

### Message from the Guest Editors

Among current challenges in wastewater treatment, the use of membrane technologies is becoming increasingly common for biological, tertiary, or recovering treatments, offering advantages such as compactness, flexibility, and ability to operate reliably under remote control at low energy consumption. However, their major drawback in working with wastewater is membrane fouling.

For this Special Issue, papers on modelling approaches to wastewater membrane filtration processes are welcome. Both empirical and theoretical models as well as artificial neural networks, computer fluid dynamics, genetic algorithms, etc. are welcome. The aim is to publish research that contributes to the knowledge of membrane separation processes through modelling.

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
