Simulation and Monitoring of Sewer System

Guest Editors:

Prof. Dr. Tzu-Yi Pai

Department of Science
Education and Application,
National Taichung University of
Education, Taichung, Taiwan

Prof. Dr. Terng-Jou Wan

Department of Safety, Health and
Environmental Engineering,
National Yunlin University of
Science and Technology,
Douliou, Taiwan

Prof. Dr. Liang-Ming Whang

Department of Environmental
Engineering, National Cheng
Kung University, Tainan, Taiwan

Deadline for manuscript
submissions:

closed (20 August 2022)

Message from the Guest Editors

Sewer systems are one of the core facilities for the water environment because they convey wastewater from households and industries to wastewater treatment plants for clarification. Wastewater contains complex compositions, including carbon, nitrogen, phosphorus, and sulfide compounds with different oxidized states.

Wastewater quality changes in sewer systems due to microbial processes during transportation. The transformation of soluble and particulate compounds occurs in bulk water and biofilm, respectively. Wastewater quality also changes under either aerobic or anaerobic conditions, which are determined by the dissolved oxygen concentrations [...]

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
