Science, Victoria University,  
Melbourne 8001, Australia

**Dr. Muhammad Atiq Ur  
Rehman Tariq**

College of Engineering and  
Science, Victoria University,  
Melbourne 8001, Australia

Deadline for manuscript  
submissions:

**closed (30 June 2022)**

### Message from the Guest Editors

Dear Colleagues,

With the effects of climate change becoming both more prominent and more noticeable, extreme rainfall events are becoming an inevitable reality. Additionally, in recent years, recorded data have shown that cities around the world will experience more heat waves. Such frequent events will increase the risk of hospitalisation for more people, which will obviously have a huge impact on existing hospital systems.

In order to mitigate the above problems, many applications of various green and/or blue infrastructure strategies have become more popular. However, these strategies come with many challenges and issues that limit their ability to mitigate the urban heat island effect and reduce heat stress, improve stormwater management, retard runoff attenuation, and enhance livability and wellbeing. [...]

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
