Message from the Guest Editors

Dear Colleagues,

Water governance is influenced by complex and increasingly dynamic interplay between various social-ecological factors. Contributing to effective water governance in times of complexity and change are issues associated with perceptions of resilience, institutional arrangements, praxis, and learning. This Special Issue aims to contribute knowledge on these issues of water governance through place-based case studies throughout the world, and, in particular, lessons for water governance in Europe.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Water Science and Technology)
