## Environmental Effects of Natural Processes and Human Activities on the Water Environment in Watershed

Guest Editors:

**Prof. Dr. Guilin Han**

Institute of Earth Sciences, China University of Geosciences (Beijing), Beijing 100083, China

**Dr. Xiaolong Liu**

Tianjin Key Laboratory of Water Resources and Environment, Tianjin Normal University, Tianjin 300387, China

Deadline for manuscript submissions:

**closed (20 August 2024)**

### Message from the Guest Editors

This Special Issue aims to present studies on water environment and hydrology changes in watershed under the influence of human activities and natural processes, and clarify the biogeochemical processes and influencing factors of the nutrients and pollutions in different watershed. This Special Issue intends to share innovative ideas from various perspectives within the field, and the topic could be addressed from several different viewpoints:

Watershed-scale transformation and migration mechanisms of nutrients and other pollutants influenced by human activities and natural progress.

Mechanisms of different kinds of water pollution and deterioration in watershed, including eutrophication, hypoxia, and greenhouse gas emissions.

Quantitative and qualitative identification of the contribution of potential sources of nutrients and pollutants.

Assessment of the environmental effects of human activities coupled with natural processes on biogeochemical cycling and transformations of nutrients and pollutants in watershed.

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
