

## Special Issue

# Water Scarcity: From Ancient to Modern Times and the Future, Volume II

### Message from the Guest Editors

This Special Issue of *Water* entitled “Water Scarcity: From Ancient to Modern Times and the Future” aims to address all the above aspects by seeking relevant research and review manuscripts. More analytically, the scope of this SI could include:

- The collapse of old civilizations: The role of drought;
- Urbanization and water supply;
- The history of water science and technology;
- Climate change variability and water quality and supply;
- Water supply under water scarcity;
- Irrigation and drainage under water scarcity;
- Water use efficiency issues;
- Water scarcity and land use: environmental and climate impacts;
- Water scarcity, food production, and economy impacts;
- Water scarcity and energy;
- Water scarcity and soil and water resources management;
- Water reuse;
- [...]

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Water Science and Technology)
