

## Special Issue

# Assessment of Water Use in Livestock Production Systems and Supply Chains

### Message from the Guest Editors

This Special Issue, focused on water use in livestock production systems, aims to advance and harmonise the assessment of water use in livestock production systems and supply chains worldwide. It will collect selected contributions from the OECD (Organisation of Economic Co-operation and Development) CRP (Co-operative Research Programme: Sustainable Agricultural and Food Systems) sponsored international experts workshop focused on "Water use assessment of livestock production systems and supply chains", held in Potsdam, Germany, on 14–16 December 2022, as well as spontaneous submissions from experts working in the subject reporting recent developments in water use efficiency and assessment in livestock production, including case studies, comparative assessment, and method validation reports.

---

### Guest Editors

Dr. Katrin Drastig

Leibniz Institute for Agricultural Engineering and Bioeconomy (ATB),  
Max-Eyth-Allee 100, 14469 Potsdam, Germany

Prof. Dr. András Székács

Agro-Environmental Research Centre, Institute of Environmental Sciences, Hungarian University of Agriculture and Life Sciences, Herman O. u. 15, H-1022 Budapest, Hungary

---

### Deadline for manuscript submissions

20 May 2025

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Water Science and Technology)
