

Special Issue

Water, Sanitation, and Hygiene in Humanitarian Contexts

Message from the Guest Editors

This Special Issue is dedicated to the theme of humanitarian emergency WASH and seeks to capture the most up-to-date research and field experience curated to benefit practitioners, decision-makers, scientists, and engineers. Given the complexities of operating and researching in humanitarian contexts, relevant WASH research applied to development contexts will also be considered for this issue. We would therefore like to call for original papers to disseminate and share research findings the theme of WASH in Humanitarian Contexts. Papers will be selected by a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, development and application.

Guest Editors

Dr. Caetano C. Dorea

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Water Science and Technology)
